FRUIT TREES, *and* ORNAMENTAL  
NURSERY STOCK

# PRICE LIST

## BARNES BROS NURSERY CO.

YALESVILLE, CONN.

Effective December, 1925

This list cancels all previous lists.

---

### Terms on Which We Sell Nursery Stock

OUR TERMS are cash with order for all amounts of \$10.00 or less. We will ship larger orders C.O.D. providing 25 per cent of the total amount is sent with the order. If the order is sent by express, you pay balance to your express agent upon delivery of stock. If the order goes by freight, you pay the balance at your bank, where you will find bill of lading, which you give to your freight agent, who will deliver shipment to you.

**HOW TO SEND MONEY:** By personal check, express money order, post office money order, bank draft or cash in a registered letter.

**USE ORDER BLANK WHEN POSSIBLE** and write name plainly and be sure to state in the blank spaces provided when, where, and how you want the shipment sent every time you order. Write letters on a separate sheet of paper.

**5% DISCOUNT** is allowed all prepaid orders, for which the total amount is sent with order. We do not allow any discount for balances paid on arrival of stock.

**ORDER EARLY** — January, February or March if possible. This enables our regular office force to handle the order, while if you wait till the busy shipping season, it may have to be seen to by clerks with less experience. Also, late in the season we are liable to be sold out of some variety or size you may want.

**PARCEL POST** shipments. For small packages we recommend Parcel Post, as it is the safest, quickest and most economical method of shipment. If you reside on a rural route, the package will be delivered to your door.

**THE SIZE OF PACKAGE** is limited to 84 inches combined length and circumference. The weight is limited to 70 pounds to points within first, second, or third zones or within 300 miles of Yalesville. To points farther away the limit is 50 pounds. Pay mail carriers or postmaster Parcel Post charges when the stock arrives. This is the cheapest and best way, as it is impossible to accurately estimate the weight of packages in advance, and by the C.O.D. method you only pay actual cost. It is true that the cost of the C.O.D. is 10 cents and for returning postage to sender is 3 cents, total 13 cents, but this is well worth the cost as the package is practically insured against loss for these packages are given special attention by the postal clerks.

## **TRANSPORTATION CONDITIONS**

Our goods are sold F.O.B. cars at the point of shipment and travel at the purchaser's risk and expense. We do not guarantee safe delivery. The ownership of all goods sold by us passes to the purchaser after delivery by us to the carrier, and the issuing of a receipt by the carrier ends our responsibility. Any claims for damage should be made promptly to the agent of the transportation company at the point of delivery.

**CLAIMS**, if any, must be made upon receipt of goods, when they will be carefully and cheerfully examined and, if just, satisfactory adjustment will be made with purchaser. Claims made after five days from receipt of goods will not be entertained.

**NON-WARRANTY.** (1). If any nursery stock shall prove untrue to the label under

which it is sold provided notice and proper proof thereof are furnished by the purchaser, to the seller, the seller shall at the option of the purchaser either refill that portion of the order which was mis-labeled by another delivery of stock, or refund the purchase price; but in any case, we are not to be held responsible for a sum greater than the original selling price of such stock. (2). All sales or agreements of sale are made subject to shortage of nursery stock, fire, frost, floods, drought, or other causes beyond the control of the seller.

**INSPECTION.** Our Nurseries have been thoroughly inspected and found free from San Jose Scale and other injurious insects or diseases. Certificate accompanies shipments.

**WE CANNOT REPLACE STOCK GRATIS.** These prices do not include any guarantee of growth. We will guarantee our stock to be in first-class condition when delivered to our railroad station, but as we have no control of the stock after it leaves our hands, we cannot be responsible for it. Remember, a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds and is liable to attacks of diseases and insects.

**APPLICATION OF RATES.** Customers may select six of any particular variety at dozen rates, fifty at hundred rates or three hundred at thousand rates, such as six Baldwin or fifty Baldwin.

**SIZE OF ORDERS.** Owing to high costs incident to the handling of orders, we cannot accept orders amounting to less than \$2.00.

**GRADES.** We grade primarily by caliper, height being only approximate, and this places many of our trees in the second grade, which might be sold as first grade by those who grade only by height. We consider that good stock, well graded by caliper, will give more general satisfaction year after year than when graded by height.

## APPLE TREES

## CORTLAND APPLE

This new variety which originated at the New York Experiment Station has attracted a great interest among apple growers the country over, because it fills a long felt want, an apple of the McIntosh type ripening later and without the faults of that variety. Cortland originated from a cross of McIntosh with Ben Davis and combines the good qualities of these varieties and at same time eliminates their weaknesses. The quality is very similar to McIntosh. Has the delicate perfume, white, crisp, spicy flesh, dark red skin covered with a thick bloom, and by most people would be thought to be McIntosh. The flesh is a little firmer, making it a better shipper, the size larger and looks very attractive when packed for market. You do not have to leave everything to pick Cortland when they are ripe as you have to McIntosh, for they will hang to tree like Ben Davis. Another thing, they ripen a month later and keep in common storage till January and cold storage till March.

The tree resembles McIntosh in looks and growth until it comes into bearing, when it begins to droop somewhat like Ben Davis.

The Cortland was awarded the Wilder Silver Medal for new fruits at the meeting of the American Pomological Society, November, 1923.

The Rural New Yorker of November 3, 1923, says editorially, "We think the introduction of the Cortland apple is a great event in the history of New York fruit growing. It is no chance seedling like Baldwin or Spy, but the result of a deliberate attempt to reproduce the fine qualities of McIntosh with the addition of virtues which that fine variety lacks. The result is a large, finely colored apple, retaining much of the McIntosh flavor, fully a month later, a good keeper and with the ability to hang to the tree. We do not want to start any unhealthy "boom" for Cortland or encourage our readers to pay extravagant prices for trees, but it seems to us the most promising variety for this section that has been introduced for years."

The Baldwin has for years been the standard winter variety for Southern New England, New York, Pennsylvania and other sections, but of late years it has failed to yield the crops it used to, the trees have suffered more from winter injury. The Cortland promises to fill the want of a variety to replace Baldwin.

Think this matter over and arrange to plant an orchard of Cortland in bearing before every one else has them and get the top prices. Think what you would have made if you had planted a big orchard of McIntosh 35 years ago, and do not let this opportunity slip by without planting some Cortland. Our trees are reasonable in price and are fine thrifty trees. We have the biggest stock of Cortland trees in the country, all grown from bearing orchard trees and guaranteed true to name.

## PRICE OF CORTLAND TREES

	Each	Dozen	100
1 year, 4-5 ft. ....	\$1.00	\$10.00	\$75.00
1 year, 3-4 ft. ....	.80	8.00	65.00
1 year, 2-3 ft. ....	.70	7.00	50.00
1 year, 1-2 ft. ....	.50	5.00	40.00

Order now before we are sold out or you may have to wait another year or buy trees that may not be genuine.

## CERTIFIED APPLE TREES

We have had a large number of apple trees in our nursery certified to be true to name. There is attached permanently to each tree so certified a lead seal impressed on which is the name of the variety and stamp of Certification of The Massachusetts Fruit Growers' Association.

This insures at moderate expense, the fact that the trees are true to label. Although all our apple trees are just as true, they have not each tree been personally examined by experts sent here by The Massachusetts Fruit Growers' Association for that purpose.

Owing to the extra cost of the certified trees, we are obliged to charge 10 cents each in addition to regular price.

We can furnish the varieties marked \* in our general list of varieties.

## ONE YEAR APPLE TREES

One year apple trees are being used more each year by commercial growers. These trees are ideal for orchard planting and are especially adapted to pruning to the modified central leader system recommended so much at the present time. The planter is able to prune these trees so that the top may be formed high or low and the scaffold branches placed as desired. Other advantages are, the shock of transplanting is not as great, they start off quickly into vigorous growth and the cost of transportation and planting is not as much.

LET US QUOTE YOU SPECIAL PRICES when wanted in quantities. Write us the varieties wanted and the approximate number of each. By doing this early, you may be able to save considerable money.

## PEACH TREES

We have one of the best lots of peach trees we ever grew—tall, straight, clean, with the brownish yellow bark and bright red tips that indicate vigor and health. They were grown on a sandy loam that produces a remarkably fibrous root system. For 35 years we have been growing peach trees and during this time have furnished trees to many of the largest peach growers of the East.

In showing a visiting nurseryman through our peach nursery recently, he said it was the first nursery he had been in where he could not see over the tops of the peach trees.

### THE NECTAR PEACH

The earliest yellow peach known

Why plant a white peach when you can have a yellow peach that is of much better quality and just as hardy? The Nectar is as hardy as the hardiest peach, ripens among the earliest, and is yellow with beautiful striped red cheek. It is a wonderful variety for you who have roadside stands. All you have to do to make a sale is to give a customer one to taste.

### LIZZIE

Ripens about two weeks after Elberta. Is of light yellow with nice red cheek. Quality very good and is of large size. It is a good shipper and valuable for local and long distance markets. Mr. H. W. Hathaway, of Massachusetts, says after fruiting Lizzie that it seems to be the best peach of its season that he knows of.

## BRACKETT

Brackett is a large yellow freestone peach ripening just after Elberta. It is fully as large as Elberta and looks so much like it, that it would pass for Elberta in any market.

You will find it profitable to follow Elberta with a peach like this, then plant Lizzie to follow Brackett, and you will have a succession that will make you money.

## PEAR TREES

## LATHAM RASPBERRY

(Minnesota No. 4)

Originated by the great Minnesota State Fruit Breeding Farm and described as follows:

"King X Louden. Probably the most valuable single production from the Fruit Breeding Farm. Plants vigorous, canes tall, nearly thornless, reddish in color, upright, hardy; berries rich red in color, large in size, many double fruits appearing at the first picking, firm, holds up well under shipment and ripens evenly over a long season. Matures about one week later than King. A valuable commercial variety because of its hardiness, productivity and quality."

The Latham Raspberry is without doubt the best red raspberry for the grower to plant today. Originating in Minnesota, they have proven entirely hardy in the Dakotas and the Northwest where only the very hardest trees and plants can withstand the extremely cold winter weather. It ripens its fruit about a week after the earliest red raspberries.

Some remarkable yields of Latham have been reported in past as high as 3600 quarts per acre.

The berries are large in size and hold size well throughout picking season.

The hardiness of Latham, the large size, firmness, and its productiveness, combine to make it really "The Wonder Raspberry" as it is called sometimes.

## BIG WONDER

Big Wonder is a vigorous grower, foliage is tall and large. The berries are large and beautiful in form and color. It is a perfect flowering variety and needs no other planted near it. Big Wonder does best grown in hills or narrow rows.

Price \$1.00 per 100, \$7.50 per 1000.

## GIBSON

This variety is largely grown in the strawberry regions of the West and we have had so many calls for plants of this variety that we have grown a supply of plants for our customers. We have not fruited Gibson but Western growers who have say that the fruit is large, high quality, firm, dark red in color, with no white tips. The berries command the highest price on the market. The plants have a long root system which enables them to stand more dry weather than

most varieties. The foliage is large, tough and leathery, making it resistant to insects and disease. The blossoms are perfect, and rich in pollen. Ripens in mid-season and continues over a long season.

Price \$1.00 per 100, \$7.50 per 1000.

### MARVEL

This variety was introduced by the R. M. Kellogg Co. in the Spring of 1922. We have not fruited it yet, but the introducers say, "Marvel is a marvelous grower, a marvelous producer, a marvelous money maker. The berries are large, of black-red color. The fruit is firm and carries well to market. A wonderful variety to grow in hills or narrow rows." It is a perfect flowering variety and a good one to plant beside imperfect flowering varieties. It is also valuable as a canning berry, being rich in color and firm.

Price \$1.00 per 100, \$7.50 per 1000.

**EVERBEARING VARIETIES** of Strawberries 75c for 25, \$2.00 per 100. Perfection, \$1.00 for 25, \$3.00 per 100.

Everbearing Strawberries are a valuable addition to the home fruit garden. They have been grown long enough to demonstrate their value. They can be grown anywhere other varieties can. For best results the blossoms should be kept cut off until about the first of August and from then on there will be blossoms continually until severe frost.

If you have never grown them, get a start this year. If you raise more than you need for home supply there is a ready sale for all you can produce at big prices.

Please write in the quantity, full name of variety, size or age and price. Any necessary correspondence should be written on a separate sheet.

We substitute, unless instructed to the contrary, but never until the varieties are exhausted. If you do not want us to substitute, in case we are out of the varieties or sizes ordered, write the word NO here \_\_\_\_\_ in which case we will refund the money sent for same.

**NON WARRANTY.** If any nursery stock proves untrue to the name under which it is sold, provided notice and proper proof thereof are furnished by the purchaser, to the seller, the seller shall, at the option of the purchaser, either replace free of charge said misnamed nursery stock, or refund the purchase price. Except for the aforesaid agreed liability, it is agreed that the seller, The Barnes Brothers Nursery Company, gives no warranty, express or implied, as to description, productiveness, or any other matter of nursery stock it sells.

We have on hand the following booklets for the use of our friends and customers and would be pleased to send copies to those who wish them and will write us for them.

### **DESCRIPTIVE CATALOGUE OF FRUIT TREES**

The leading varieties of fruit trees and plants that are grown in New England are described. Ready in January.

### **DESCRIPTIVE CATALOGUE OF ORNAMENTAL TREES AND PLANTS**

In it are described the trees and plants for ornament and shade we usually grow and have on hand for sale.

### **HOME BEAUTIFYING SUGGESTIONS**

This is a 48 page list of hardy ornamental trees and shrubs briefly describing how, where, and for what purpose each should be planted.

28 pages are devoted to illustrations of houses and grounds planted with trees and shrubs, and a list of trees and shrubs used in the planting.

### **HOW TO PLANT TREES AND PLANTS**

A booklet describing care of nursery stock on arrival, the details of laying out and planting of an orchard and planting of various trees, plants, bulbs, etc.

### **IT'S NOT A HOME TILL IT'S PLANTED**

**and**

### **IT'S NOT A FARM HOME WITHOUT FRUIT**

Two charming little booklets giving good reasons why every home should have trees and plants about it.

### **DESCRIPTIVE LIST OF FARM AND GARDEN BOOKS**

Describes and prices the best books published on the above subjects. Write for any of the above named booklets. They will be sent without charge.
